 Keio University

Teaching motivated students how to think using economics

Our goal is to turn out leaders that thrive in a world with increasing uncertainty and diversity. Towards this end, our curriculum is designed to give students both knowledge and the ability to think logically.

3 Pillars of Professional Education

1 Research Seminar

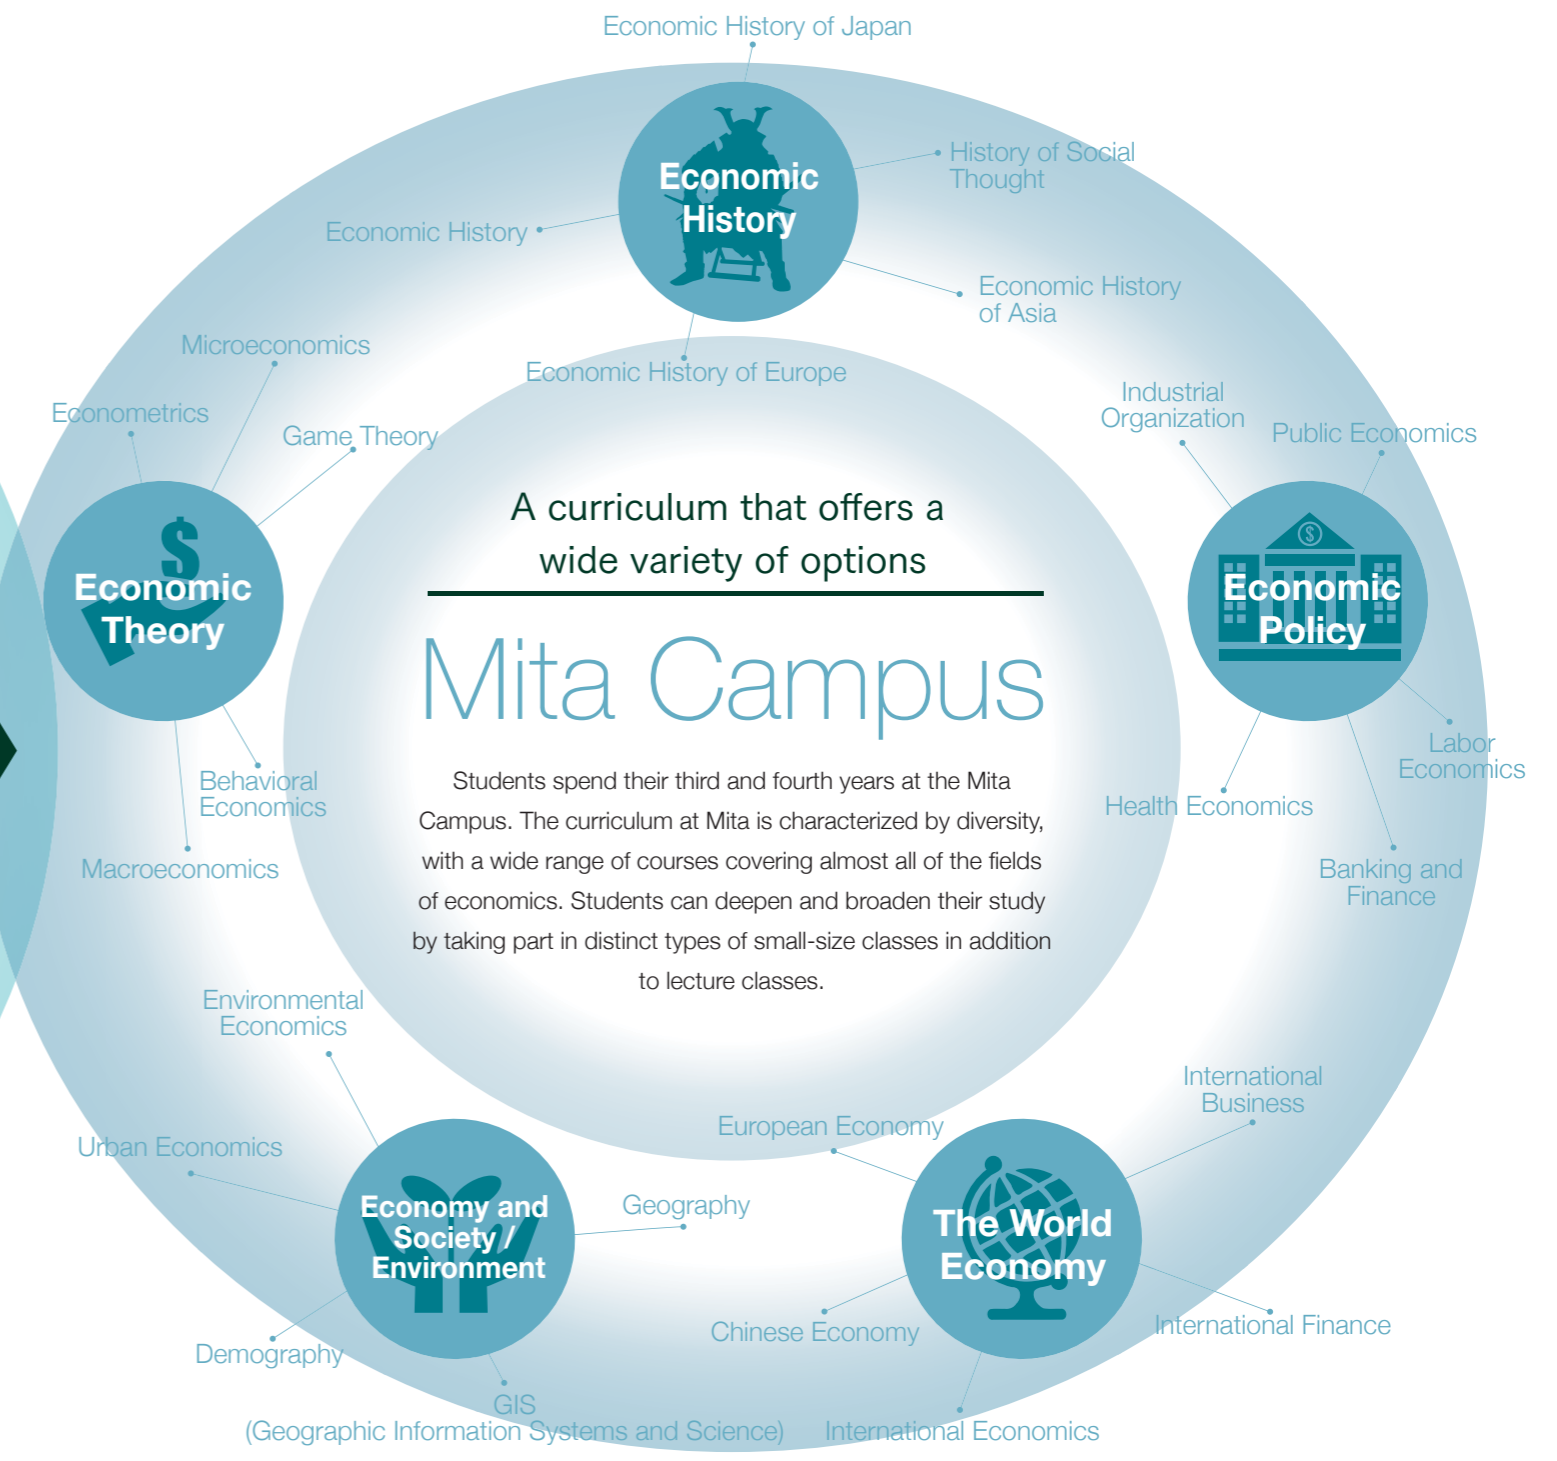

A long tradition of professional education courses offered in small classes. Students study in depth in a specialized field for 2 years under the guidance of a specific faculty member and put together the results of their studies in a graduation thesis.

2 Independent Research Project

Independent research course in which students set their own theme and write a thesis over the course of one year. Research can be conducted not only in economics but also in other fields.

3 PCP (Professional Career Programme)

A small-group professional education course offered entirely in English. Students learn specialized knowledge and experience project-based classes.

New certificate programs established in 2022

Two certificate programs have been launched: DEEP (Data-driven Economics and Econometrics Programme) on data science and FACTS (Fieldwork for Active Comprehension of Targeted Subjects) on field research. We nurture individuals who can play an active role in fields of high social demand.

Introduction of 3.5-year Early Graduation System

A 3.5-year early graduation system has been put in place since the 2023 academic year, which allows students to graduate after 3.5 years (7 semesters) of enrollment. Objective

- To encourage April enrollees (Type AB students) to pursue their graduate studies abroad
- To encourage September enrollees (PEARL students) to find employment in Japan
- To implement an internal 5-year BA/MA programme of 3.5 years + 1.5 years in collaboration with the Graduate School of Economics

PEARL

Learning Economics in English in JAPAN

Programme in Economics for Alliances, Research and Leadership

The PEARL programme aims to develop leaders who can build economic alliances in Asia and beyond, and who will make the Faculty of Economics at Keio a global hub of education and research partnerships.

By following Keio's tradition of "han-gaku, han-kyo" (learning while teaching, teaching while learning), professors and students produce intellectually stimulating research.

As intended by our founder, Yukichi Fukuzawa, our graduates come from all over the world to become people who will shape the future.

PEARL was founded to foster true global leaders.

Just like a pearl oyster covers a grain of sand with many layers of nacre to create a pearl that grows in beauty and lustre, the name of our programme, PEARL, reflects our goal of nurturing students with keen minds through the highest standard of learning.

By offering a world-class education in advanced economics in English, students from Japan and around the world can interact and learn together. PEARL is designed to foster the global leaders of tomorrow.

Admission

<https://www.keio.ac.jp/en/admissions/undergraduate/pearl/>

- Three application periods between October and April
- No interview conducted. No need to come to Japan for the exam.

Application Documents

- 1 Academic Background Brief Self Introduction
- 2 IB/SAT/ACT
- 3 TOEFL/IELTS
- 4 Written Statement of the Applicant's Academic and Future Goals
- 5 Letter(s) of Reference
- 6 High School Graduation Certificate (or a document certifying expected graduation)
- 7 High School Academic Transcripts
- 8 Document Confirming Applicant's Identity
- 9 Other optional materials, including standardised national examination scores

1

All-English Programme that starts in September

Admission to PEARL is limited to 100 students each year. PEARL is an all-English four-year elite BA programme in economics with an academic year that begins in September.

2

Learning the essentials of economics

The first two years of the PEARL programme at our Hiyoshi Campus are designed to provide students with a strong grounding in the fundamental knowledge necessary to pursue their individual paths of study. Students then go on to study at our Mita Campus for their third and fourth years to develop their expertise and broaden their learning.

3

A research system that enables you to deepen your understanding of your field of interest

The pursuit of small-group education is a feature of Keio University. In the Faculty of Economics, small group education includes Research Seminars and Independent Research Projects where you can devote yourself to completing a research thesis on your topic of interest.

4

Fulfilling options for studying abroad

We have a wide variety of study abroad programmes, such as the Double Degree Programme where students are awarded degrees from both the Faculty of Economics at Keio and a partner university by satisfying the graduation requirements of both institutions, and BA/MA Five-Year Programme where students are awarded a bachelor's degree from Keio and a master's degree from a partner university. Also, we offer faculty-wide exchange programmes which provide students with the opportunity to study at an overseas university for one or two semesters.

5

BA/MA Five-Year Programme

The Faculty of Economics has agreements with HEC Paris (France), Sciences Po (France), Bocconi University (Italy), the University of Cologne (Germany), Brandeis University (USA) and the Stevens Institute of Technology (USA) for the BA/MA Five-Year Programme. Students of the Faculty of Economics' PEARL programme who satisfy the graduation requirements are awarded a BA in Economics degree from Keio and a master's degree from a partner university.

6

Campus life in Tokyo and Kanagawa

Japan is one of the safest countries in the world. Tokyo and Kanagawa, located in central Japan, are part of a large metropolitan area that has easy access to many places not only in Japan, but also in the rest of Asia. The Faculty of Economics at Keio has campuses in both Tokyo and Kanagawa, and its students benefit from the convenience of these urban areas.

Be a leader who utilises his / her knowledge of economics on the world stage

The Faculty of Economics has three different types of study abroad programmes which are available only to students in the Faculty of Economics: faculty-wide exchange programmes, double degree programmes, and BA/MA five year programmes.

The flow of those three programmes are shown below.

The following chart applies to PEARL students who start an academic year in September.

(Students who passed other types of admission examinations enter university in April.)

Academic Year Starts in September

Double Degree Programme

Students who satisfy the graduation requirements of two universities will be awarded two Bachelor's degrees; one from Keio University and one from a partner university.

Student Exchange Programme (Faculty-wide)

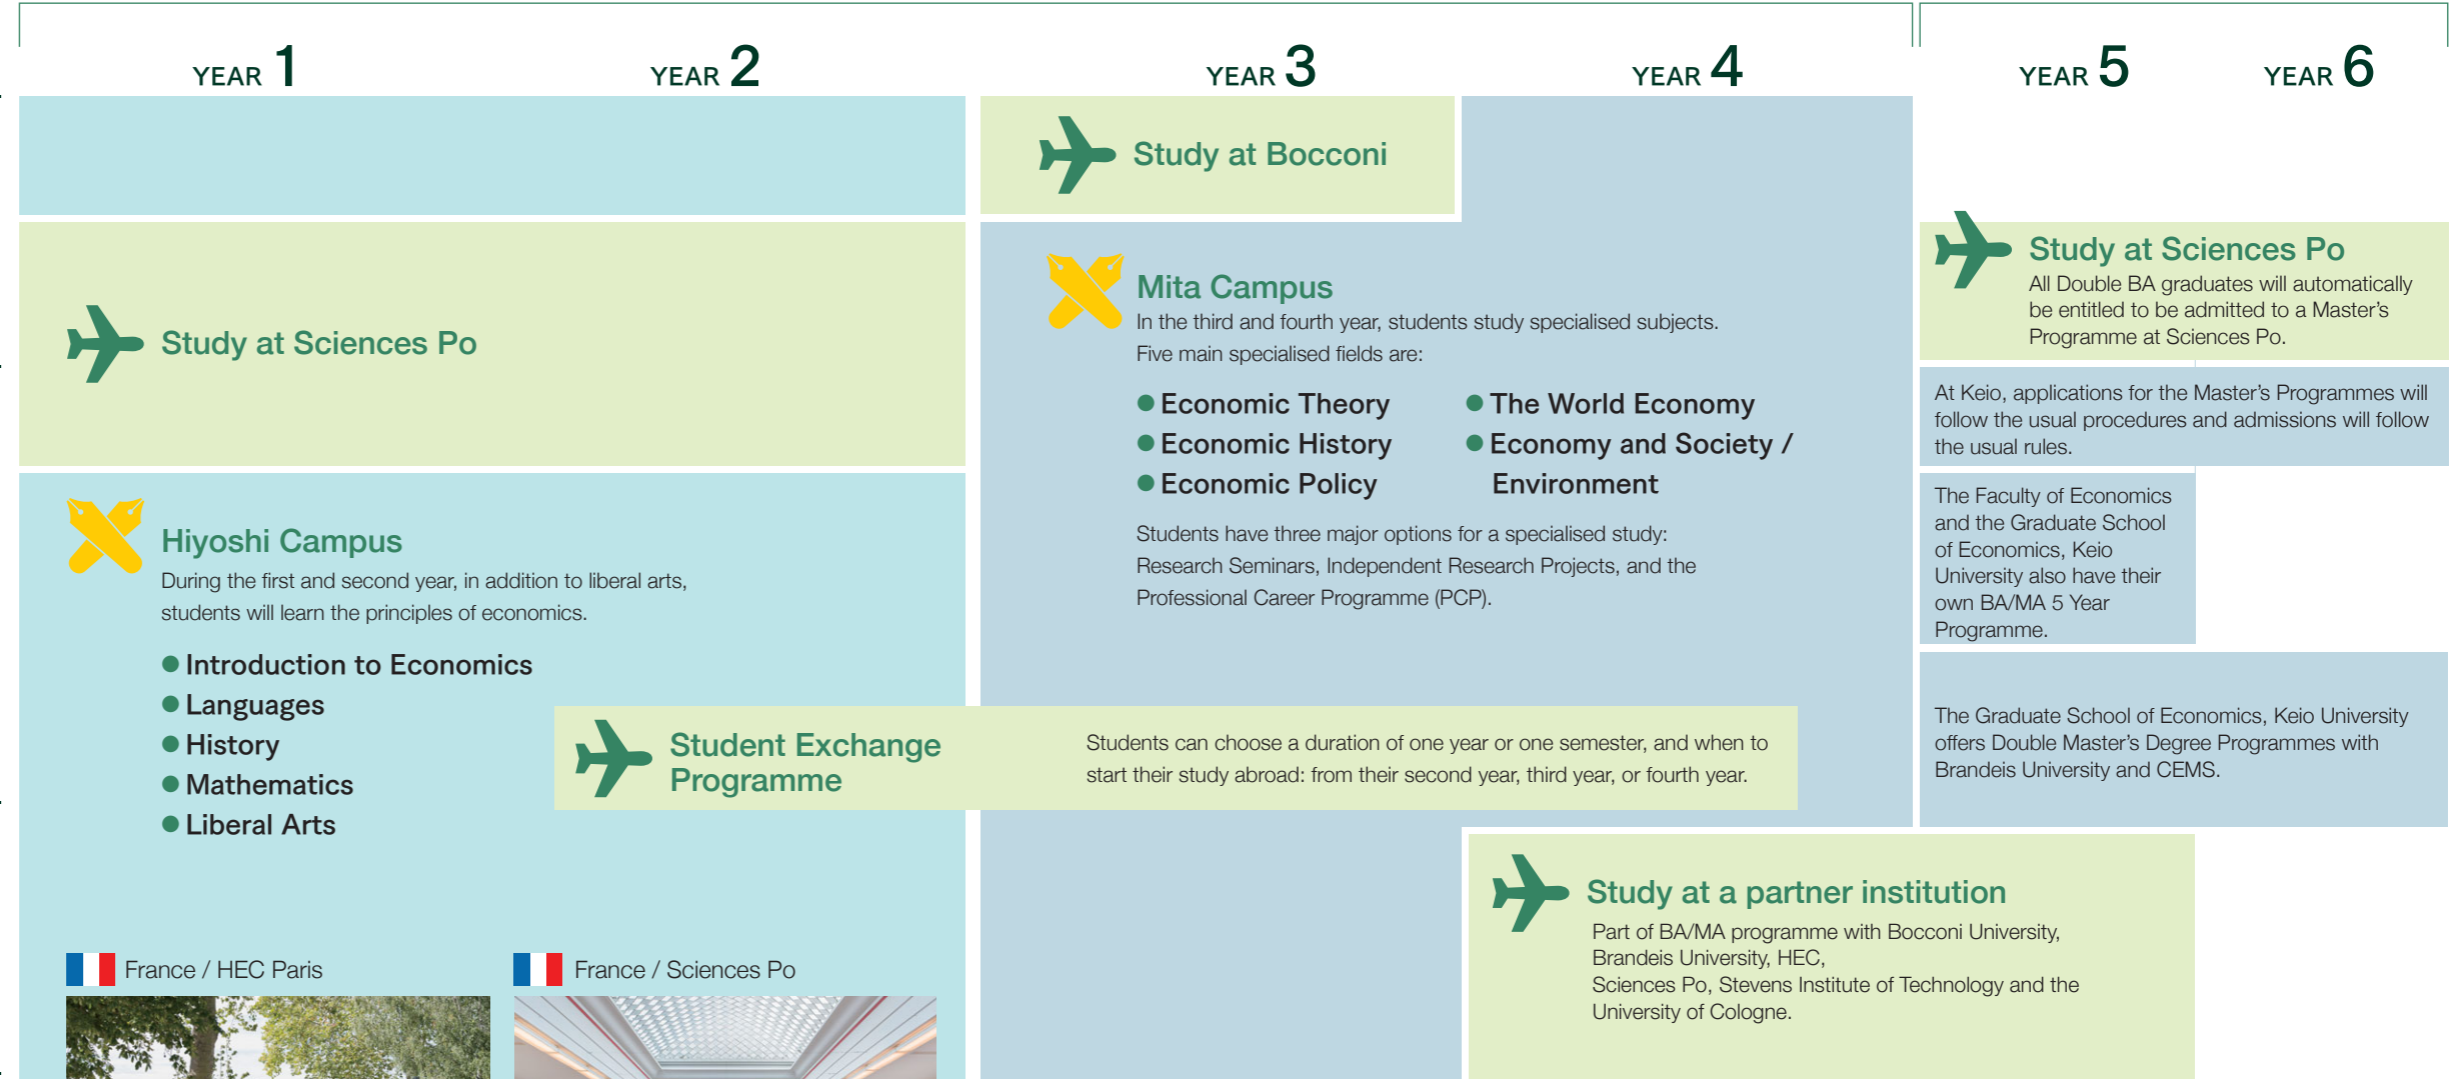

All students study at our two campuses.

In our Student Exchange Programme, students have various choices of host universities, duration, and timing on their exchange. We have agreements with a total of 32 universities in North America, Europe and Asia (as of April, 2023).

BA/MA 5-Year Programme

Students who satisfy the graduation requirements will be awarded a Bachelor of Arts in Economics from Keio and a master's degree from a partner university in five years.

Academic fees:

1,378,350 YEN (First year)

Although it is said that commodity prices in Japan are unusually high, students can find ways to keep their costs down, for example by taking advantage of the university's facilities. There are several cafeterias on the Hiyoshi and Mita campuses, which provide delicious and reasonable dishes. If you are looking for a place to stay, don't forget to check out the Keio University dormitories. <https://www.keio.ac.jp/en/student-life/housing.html>

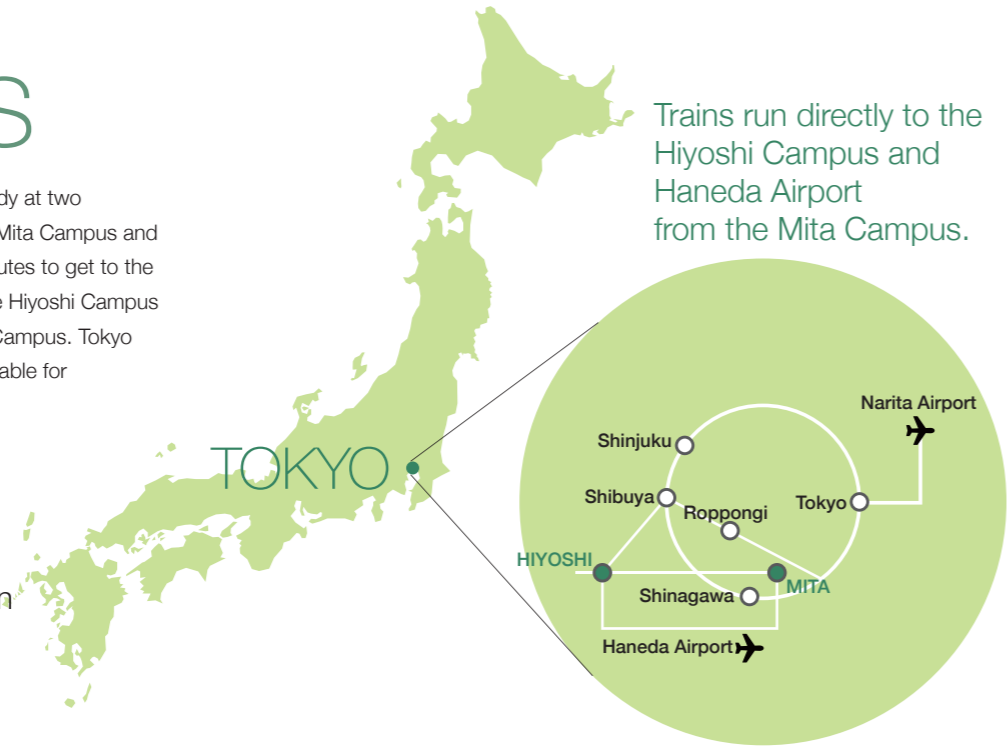

Access

Students in the Faculty of Economics study at two campuses in the greater Tokyo area; the Mita Campus and the Hiyoshi Campus. It only takes 17 minutes to get to the Mita Campus from Tokyo Station, and the Hiyoshi Campus is about 35 minutes away from the Mita Campus. Tokyo Metro or JR Line, and city buses are available for transportation.

Messages from Double Degree Programme Participants

Learning with family-like peers in an English-French speaking environment

My interest in international relations and my will to study at a grande école specializing in political science brought me to take part in the Double Degree Programme with Sciences Po. Given the English-French bilingual experiences in my childhood, I was also attracted by an environment using English on campus and French in daily life. With many opportunities for developing my active learning skills such as reading assignments, presentations and debates, I am enjoying exciting days with family-like classmates from across the globe in a small campus consisting of approximately 160 students per grade.

The journey of challenges towards my dream to improve inequalities

Spending eight years of my early education in India, I grew up seeing the harsh realities of various social issues and conceiving diverse points of views in response to it. However, despite my diverse background, I still lack knowledge and experience to become a true global soul. Through the Double Degree Programme with Sciences Po, I have been truly privileged to learn and utilize argumentative techniques with diverse student bodies without feeling confined by borders, making everyday a filled journey of challenges. Moved by the underlying caste systems and huge inequalities I witnessed in India and my helplessness against it, I wish to work for underprivileged communities to make small changes to social inequalities in the future.

Messages from PEARL Student

My PEARL Life at Keio

My passion for the Japanese culture, especially the cuisine and fashion, led me to Japan. As I wanted to pursue economics, Keio's PEARL was the most attractive destination. In addition to the rigorous curriculum, PEARL provides many other opportunities such as double degree programs with other world class universities and a path to the CEMS program.

One aspect I like about PEARL is the liberty to take classes from other faculties as well as those offered by the International Center. I enjoy

taking courses that are in areas of my interest such as in philosophy, fashion, and the arts.

During my first and second years, I also participated in an international exchange session organized by the Institute of International Relations. This gave me the pleasure of meeting other international students at Keio.

In the future, I intend to help Japanese companies find projects in African countries to support. While many companies are willing to help alleviate social issues in Africa such as poverty, they often face the challenge of choosing the right and most efficient path to do so. I wish to act as a bridge for them to identify projects that align with their values.

I would like to encourage future PEARL students to take advantage of being in this diverse and multicultural environment. This is your opportunity to build networks with students from different countries, which will endure long even after your student life at Keio.

Enrolled in 2019

Career path after graduation

The employment rate of the graduates of our faculty is high. A little more than a quarter of graduates (class of AY2022) found employment at finance and insurance industries followed by those employed at scientific research / professional and technical services as well as information and communications industries.

■ Keio's Mita-kai - Alumni Network around the World

(As of June, 2022)

Keio University has around 390,000 alumni. Keio's alumni are known for their sense of solidarity with the university, and many go on to join Mita-kai, Keio's alumni association, to befriend and interact with other Keio graduates. Currently there are over 800 domestic and 75 overseas branches of Mita-kai.

Message from the Dean

Dean of the Faculty of Economics
Professor
Tetsuya Komagata

Taking on challenges in the spirit of *Dokuritsu Jison* (Independence and Self-Respect)

The Keio University Faculty of Economics has the longest history in Japan among faculties that specialize in economics. Our faculty has been at the forefront of the field in Japan since its establishment in 1890 as the Department of Economics. Our pedagogy is rooted in the ethos of hangaku-hankyo, or "learning while teaching, teaching while learning," in which no distinction is drawn between pupil and teacher. We have produced many outstanding graduates who hold positions in business, academia, politics, government, and other fields.

We are committed to continuously enhancing our curriculum to keep pace with developments both inside and outside our faculty, responding to society's demands and training graduates who will take leading roles in economics.

Since the beginning of the 21st century we have focused on adapting to globalization by expanding our faculty-wide study abroad system, establishing double degree programs with overseas universities, implementing integrated undergraduate and graduate programs, and offering options with classes entirely taught in English. While we are a large-scale faculty, we strive to keep classes small—another aspect of "learning while teaching, teaching while learning." Furthermore, in 2022 we launched course programs, one involving data science and another involving field research. We have also implemented an early graduation system for students who enroll in 2023 onward so that April enrollees can seamlessly begin graduate-level studies at foreign universities, September enrollees can find employment in Japan, and motivated students can obtain both a bachelor's and master's degree from our faculty and the Graduate School of Economics in just five years.

However, the main point I would like to emphasize is that our competitive edge here at the Faculty of Economics lies first and foremost with our incredible faculty more than any program configuration. This is the same principle that the source of a company's power is ultimately in its people. Our staff lead the industry in cutting-edge economics research and make valuable contributions to the real world. Their expertise in higher education in a variety of fields related to language, culture, and general education is what allows our students to flourish.

The recent pandemic has left us in a state of disarray, forcing everyone to deal with increased social division and conflict. We live in a transitional period when, in becoming a society that values diversity, we must learn how to solve new challenges as they arise.

In such times, what beacon should we use to light our path? I believe that the answer to this is the very founding spirit of Keio University, "independence and self-respect." "Independence and self-respect" signify "the maintenance of one's personal dignity and acting on one's own judgement with the responsibility this entails in everything." Our true guiding principle, then, allows us to confront and solve issues that do not currently have solutions, forging a better society.

During major societal and economic changes, we are all faced with challenging the unknown. However, your task during your time at university remains the same.

The Chinese classic *The Unencumbered Spirit: Reflections of a Chinese Sage* contains a passage along the following lines: "Self-improvement ought to be like refining metals; haste does not yield success." This proverb signals that personal development is like polishing, you only begin to shine with time. For you all to go out into the world and thrive in your chosen arena, it is vital that you hone yourself through devotion to your studies. We will strive to meet your expectations and provide the best possible "refining" opportunities to help you shine.
