

Message from the President

Naoshi Sugiyama,
 President of Nagoya University

Nagoya University is one of the top ranked comprehensive universities in Japan. Here, students and scholars work together, engage in top-notch research to pursue scientific discoveries and invent new state-of-the-art technologies. Six Nobel Prizes have been awarded to scholars associated with Nagoya University. Dr. Hiroshi Amano, Professor of Engineering, remains an active faculty member, teaching classes, directing and overseeing research activities in his laboratory. He was awarded the 2014 Nobel Prize in Physics for inventing the energy-efficient blue light-emitting diode (LED) together with Professor Emeritus Isamu Akasaki at Nagoya University and Professor Shuji Nakamura at UC Santa Barbara. This invention changed our world and our daily lives. Students of Nagoya University study with top scholars in their fields, such as Dr. Amano.

Nagoya University has committed to internationalizing the campus and promoting diversity. For more than a decade, we have offered English-taught programs, i.e., Global 30 International Programs, as an essential part of our mission. Just before the COVID-19 pandemic, the number of international students reached almost 3,000. Students came from over 100 countries and regions. Although the number of students dropped because of the pandemic, the number of applicants for the Global 30 International Programs hit a record high in 2021. We continue to promote internationalization.

To ensure accessibility, Nagoya University offers students financial aid programs. Students can apply for the G30 scholarship from Nagoya University, and MEXT scholarship from the Japanese government. In 2021, the Japanese government also introduced new funding schemes to provide financial aid to Ph.D. candidates. Almost every Ph.D. candidate now receives full scholarship/grant support and/or tuition fee exemption.

The pandemic had a terrible and long-lasting impact on the livelihoods of our students. In recognition of this, Nagoya University is providing more opportunities for our students to find and join groups, or meet individuals, on campus that match their interests. To encourage interaction among our students, we are constructing a new 7,000 square meters building in the campus's heart, between the subway station and Central Library. The new building should encourage Japanese students, international students, and faculty members to mix and socialize with each other and with people in the local community. It will open in 2024.

If you are passionate about better understanding the world, changing society and building the future, please join us at Nagoya University. We look forward to welcoming you.

About Nagoya University

The origins of Nagoya University date back to its founding as a medical school in 1871. By 1947, the Japanese Government had revised its status to a national university. Today it is a comprehensive university with more than 10,000 undergraduate and 6000 graduate students studying subjects in the Sciences, Engineering, Social Sciences and Humanities. Every year, on average, more than 2,000 international students are enrolled and 1,000 international researchers and visitors are welcomed every year. As a world-class center of research and education, Nagoya University continues to contribute to the accumulation of knowledge and the betterment of society.

Research Excellence

Faculty at Nagoya University can be found pushing the boundaries of knowledge and improving people's lives through their research.

Professor Akasaki and Professor Amano, for instance, were awarded in 2014 the Nobel Prize in Physics for their pioneering efforts on the Blue Light Emitting Diode (LED).

Nagoya University's surge of progress in research comes from its free and vibrant academic culture and it has been inherited by today's generation.

Other Nobel Laureates:

Dr. Ryoji Noyori in Chemistry in 2001
Dr. Osamu Shimomura in Chemistry in 2008
Dr. Toshihide Maskawa in Physics in 2008
Dr. Makoto Kobayashi in Physics in 2008

The City of Nagoya

The Greater Nagoya Area ranks as one of the world's most productive economic regions. A large ceramics industry makes its home here, as do companies making automobiles, automobile parts, machine tools and aircraft parts. With all its rich natural and human resources, the region draws numerous companies to house their headquarters and R&D centers here.

4th

largest city in Japan with approximately 2.3 million people

4

clear seasons throughout the year

6

subway and 4 railway lines for convenient access

From the 15th floor of the two towers of Nagoya Station, a person looking north can see the **snow**-rimmed peaks of the mountains of Gifu Prefecture. To the south lie the waters of Ise Bay and the **Pacific Ocean**. A variety of parks, such as **Higashiyama Zoo** and Botanical Gardens, offer the perfect place for a person to stroll through the burst of pink **cherry blossoms** in the Spring and contemplate the gradual transition of leaves from red to yellow in the **Autumn**.

Nagoya City Science Museum is one of the world's largest **planetarium** and most sophisticated.

1.5 hours to **Tokyo**, 50 minutes to **Osaka** and 30 minutes to **Kyoto** by Shinkansen (bullet train)

Internationally connected: The Chubu Centrair **International Airport** connects the city to countries around the world.

Safe and modern city with deep history and culture.

Heaven for foodies: Nagoya city is offering various range of selection of international and mouth-watering local delicacies.

International Programs

Since 2011, Nagoya University has offered English-taught versions of the regular programs, aiming to provide a world-class education to high-achieving students worldwide, regardless of their Japanese proficiency.

The multi-disciplinary curriculum is designed to cultivate ethical leaders, who are able to develop innovative solutions with strong communication and teamwork skills. High-achieving students and faculty members with diverse backgrounds are contributing to raising Nagoya University's educational standard to a level comparable to other top ranked universities around the world.

• English-taught programs

- Students communicate and learn to collaborate with people from a **diverse** range of **nationalities** and **educational backgrounds**
- All students receive **Japanese language education**. Students with high Japanese language proficiency can choose from other languages offered.
- **Small class-sizes** allow for more contact with faculty members and class participation
- Students work with **top Japanese and international faculty** members

Curriculum

Japanese history, films, literature, and overall culture – that's what you can learn in the JACS program at NU. The very best part of it all is, that it allows us students to discover Japan in multiple ways on and off campus! Living in Japan as a student, being around Japanese people will ultimately result into a better understanding of your studies and provide you with a deeper appreciation of Japanese culture.

Momo Mori
Japan-in-Asia Cultural Studies Program (JACS)

During the 1st semester, I usually had 3-4 classes (Mon-Fri) of 1.5 hours each. After coming back to the dorm at around 4:30 PM, I had to complete the given homework and study for tests. I always had to manage time carefully. Apart from academic work, I even had to cook food, clean my room and do my laundry. Although I had a busy schedule during the weekdays, I would try to keep a light weekend. During the weekend I would go for early morning jogs or go to play some sports (football, basketball, etc.) with friends. We would often go and try out new restaurants. When very stressed out, some of my friends and I would often go for karaoke, watch movies, walk around Nagoya or even play online multiplayer games!

Physics Program

Student Exchange Program

With over **450** International Exchange agreements, students can experience the academic and cultural life of another country in a **six-month to one-year** study abroad. Read more of G30 students' stories at: nagoyauniversityao.wordpress.com

Undergraduate Programs

G30 International Programs are full-degree programs taught in **English**. There is no Japanese proficiency requirement for enrollment. Students must choose their major at the time of application and complete a research project in their fourth year for graduation.

Financial Expenses

As a national university, Nagoya University receives much of its funding from the Japanese government. Therefore, tuition fee is the same for all students regardless of nationality. Although some areas of Japan are known for their high cost of living, Nagoya remains affordable.

Application Fee	JPY 5,000
Registration Fee	JPY 282,000 *One-time payment in first year only
Tuition Fee	JPY 535,800 /Year (JPY 267,900 /Semester)

* As of April 2023. The above fees may be subject to change.

Living Expenses (Monthly)

Accommodation (single room, off-campus apartment)	JPY 30,000 – 50,000 /Month
Food	JPY 30,000
Utilities	JPY 10,000
Telecommunications	JPY 5,000
Insurance	JPY 1,500
Other Personal Expenses	JPY 30,000 – 50,000 /Month
Total	JPY 86,500 – 106,500

* Personal expenses depend on each student's lifestyle and spending habits. The amount suggested above is for reference only.

Scholarships & Financial Support

Nagoya University G30 Undergraduate Scholarship

Registration fee	<input checked="" type="checkbox"/> *will be reimbursed after enrollment in monthly installments.
Tuition	<input checked="" type="checkbox"/> *for 4 years of study
Annual stipend	<input checked="" type="checkbox"/> JPY 500,000 /Year

* As of April 2023. The above fees may be subject to change.

Tuition exemption scheme (applicable after enrollment)*

G30 students may apply for a tuition fee exemption after enrolling into the program. Successful applicants can receive exemptions between **50 to 100** percent of total tuition.

*Please note that not all applicants will receive such exemptions due to limited resources.

Student Services

Studying abroad can be exciting while challenging at the same time. We provide our students with a range of services to assist them during their time as students here at Nagoya University.

Career Support

Nagoya city is an industrial hub, with more than 100 multinational companies located in and around the Aichi area.

The Career Services Office

- caters to international students
- organizes campus recruitments
- provides career counselling
- provides internships and part-time job opportunities

Career Path

With a great need among Japanese companies for skilled workers with international experience, the G30 International Programs excel in opening doors for our students after graduation. Many students have gone to find jobs and work in Japan and abroad.

Graduate Studies

Approximately half of our graduates have chosen to go on to further study. As students have developed the specialism through completing our research intensive curriculum, they have gone to study at Nagoya University or other prestigious universities in Japan or even abroad.

Medical Services

- Students are covered by Japan National Health Insurances (JNHI) program
- Free annual health check-up and counseling.

Accommodation

G30 students are housed in the Ishida Memorial International Residence. There is support for students entering second year in finding new housing.

- Available for the first year students
- Single room, fully furnished
- 15 minute walk from campus
- JPY 32,000 per month (excluding utility bills)
- Each room is equipped with a kitchenette, bath/toilet, microwave, refrigerator, bedding, desk, chair, air conditioner
- Free internet

* As of April 2023. The above fees may be subject to change.

#G30StudentCulture

Experience the real Japanese hospitality and prepare to be amazed! Nagoya University offers students various programs to help get to know both local students and the local community. Students have a lot of fun by organizing parties or gatherings in their spare time to share laughter and create stronger bonding.

Students celebrated Seijinshiki (Coming-Age-Day) and dressed up in formal or traditional attire.

Hanami is a popular activity organized by students where they enjoy the spring season under blooming sakura trees.

50,000+ visitors every year attend Nagoya University Festival organized by students in early June

100+ student clubs and societies, from cultural to vocational interests and from athletics to academics.

Short-term home-stay program to experience daily life in Japan and develop a greater understanding of its culture.

3,000,000+ items and includes online materials such as e-books, databases and electronic journals.
