

List of Subjects in English

In 2022, Ochanomizu University was selected as one of the "Inter-University Exchange Projects," offered by the Japanese government's Ministry of Education, Culture, Sports, Science, and Technology.

The name of our program is the Practice-Based EDI Program for Future Global Leaders. This program aims to develop global leaders who comprehend “Equity”, “Diversity”, and “Inclusion” through a variety of courses.

Thus, Ochanomizu University will offer a group of courses related to these subjects in English from the academic year of 2023. In addition, the university will also promote the beginner Japanese language classes. The university will increase the number of classes taught in English for the summer program held in July and August, and in the fall semester from October to January.

The subjects listed here will be newly offered every fall/autumn semester (from October to January) by Ochanomizu University (Some of them are not held every year) .
