School of Political Science and Economics

Introduction

Developing Universal Skills through Specialization

The School of Political Science and Economics (SPSE) was one of the original academic units established when Waseda University was founded in 1882. The synthesis of the study of political science and economics was innovative at that time and lies at the cutting edge of contemporary academia, both in Japan and globally. The School remains true to its founding goal of advancing scientific understanding of political and economic phenomena.

The SPSE offers specialized degree programs in political science and economics that are fully comparable in quality to majors in these disciplines at top universities around the world. While keeping a low student-to-faculty ratio, we offer a wide variety of courses that balance our School's traditions with a modern approach to both political science and economics. Our curriculum provides a systematic progression from introductory to advanced courses, and numerous opportunities to participate in seminars. The seminars offer an exceptionally high degree of specialization, bringing academic research and undergraduate education together. SPSE students can also take classes outside their chosen field of specialization and gain exposure to a rich canvass of knowledge and skills, including quantitative and qualitative methods training, theoretical and applied reasoning techniques, and abstract and historically grounded models of the world.

Our goal is to equip students with the skills needed to succeed in a changing world through academic excellence and intellectual freedom.

Features

Specialized Degrees

Learn in depth and systematically through specialized coursework in political science and economics

Fully Bilingual Program

Most courses are offered in English and Japanese

Develop Core Methodological Skills

Mathematics, statistics, game theory, experimental methods, network analysis, text analysis, and programming

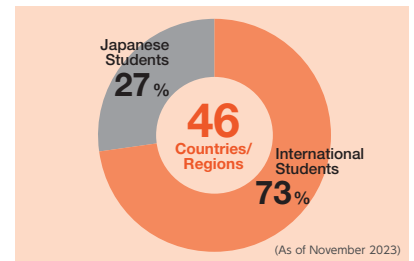

International Faculty with Genuine International Experience

International and distinguished faculty with extensive experience at leading universities worldwide

Working Closely with Professors

Small, discussion-based courses ("seminars") with professors, from the first year to the final year

Global Learning Environment

Our students come from many countries and regions around the world

We have YouTube videos you can access through this QR code or URL.

<https://bit.ly/spse-pv>

Degrees

- Bachelor of Arts in Political Science
- Bachelor of Arts in Economics
- Bachelor of Arts in Global Political Economy

Curriculum

Each of our three majors is defined through respective credit requirements that comprise courses in political science and economics.

	Introduction	Foundation	Specialization
Political Science	Political Analysis	Contemporary/Japanese Politics	Political Communication, Political Institutions, Political Behavior, Comparative Political Economy, etc.
		Comparative Politics	Comparative Democratization, Politics of Western Europe, Politics of East Asia, etc.
	International Relations	International Politics	International Organization, International Political Economy, International History, etc.
		Public Policy	Public Policy, Public Administration, Local Government, NPOs and NGOs, etc.
	Public Philosophy	Political Thought and Political History	Japanese Political Thought, Western Political History, Constitutionalism, Contemporary Political Theory, etc.
Economics	Microeconomics	Economic Policy	Labor Economics, Health Economics, Environmental Economics, Political Economics, Law and Economics, etc.
		International Economics	Development Economics, Asian Economy, Spatial Economics, etc.
	Macroeconomics	Intermediate Micro/Macroeconomics	Japanese Economy, Advanced Micro/Macroeconomics, Welfare Economics, Public Economics, etc.
		Finance	Money and Banking, International Trade, Public Finance, etc.
	Economic History	Japanese Economic History, Global Economic History, Economic Thought, Institutional Analysis, etc.	
Methodology	Game Theory	Mathematical Analysis	Advanced Game Theory, Behavioral Economics, Experimental Economics, Mathematical Economics, etc.
	Statistics	Econometrics	Quantitative Analysis, Network Analysis, Applied Econometrics, Advanced Econometrics, etc.
Seminars	Basic Seminar	Intermediate Seminar	Advanced Seminar, Thesis
Academic Writing, Japanese and Other Languages, General Studies, etc.			

*Courses are subject to change.

Study Abroad Programs Exclusively for SPSE Students

In addition to the University's study-abroad programs, SPSE runs programs exclusively for SPSE students.

Double-Degree Programs

National Taiwan University	Taiwan
The Hong Kong University of Science and Technology	Hong Kong

Exchange Programs

City University of Hong Kong	Hong Kong
Victoria University of Wellington	New Zealand
Vrije Universiteit Amsterdam	Netherlands
University of Milan	Italy
UiT The Arctic University of Norway	Norway
IESEG School of Management	France
...and more	

3+1 Consecutive Degree Program with the University of Essex, England

Under the innovative "3+1" program, accomplished students at SPSE complete their B.A. at Waseda in **three years** and proceed to a prestigious **one-year Master's program** at either Department of Government or Department of Economics.

Scholarships

In addition to the scholarships offered by Waseda University, several scholarships (e.g., the Howard Hagiya Scholarship) are available exclusively for SPSE prospective students with outstanding entrance exam scores. Various other scholarships, such as those provided by the Bai Xian Asia Institute, are available to current SPSE students with excellent academic records.

School of Social Sciences

TAISI Transnational and Interdisciplinary Studies in Social Innovation Program

Introduction

Become a Social Innovator

The aim of the TAI SI Program is to create “Social innovators” and train students to become leaders for social change. Students in the TAI SI Program will not only gain general knowledge in the social sciences, but also practical and specialized knowledge. This is provided through fieldwork and theoretical courses in the following four fields: Community & Social Development, Peace Building & International Cooperation, Economic & Environmental Sustainability, and Social Organizations & Working. As the world continues to globalize and advance, it has become increasingly important that as citizens of the world, students need to not only approach global issues from an international perspective, but also discover and implement more effective, sustainable, and fair solutions to these issues.

Features

Hands-on Experience

Students will engage in either on-site research or classroom simulation to find feasible and sustainable solutions to social issues.

Multidisciplinary Research

Students study the social sciences via a broad base of multidisciplinary and foundational knowledge with a focus on four fields.

Japanese Perspective

Students study these fields from the Japanese perspective and investigate whether Japanese methods can be applied or adopted.

School of International Liberal Studies

Introduction

Crossing Borders, Sharing Cultures, Inventing the Future

The School of International Liberal Studies (SILS) offers a unique environment where students from approximately 50 countries and regions around the world come together to study a wide range of subjects and exchange views with each other. The small-sized classes feature professors whose backgrounds are as varied as those of the students.

Students at SILS pursue a liberal arts curriculum which emphasizes the fostering of knowledge of various different areas, gaining multidimensional perspectives, developing logical thinking, and acquiring language skills over four years. In addition, the school offers a wide variety of innovative programs and support for not only the student's studies, but also in choosing and embarking on their future careers, whether in Japan or abroad.

By becoming a member of this international community, students will gain the skills required to thrive in today's multicultural world through working and interacting with one another.

Features

<p>1</p> <p>Life, Environment, Matter and Information</p> <p>Artificial Intelligence, Biology, Calculus, Data Science, Environmental Science, Mathematics, Physics, Programming, etc.</p>	<p>2</p> <p>Philosophy, Religion and History</p> <p>History (Media, Physical Science, Region, Society, etc.), Historical Survey, Philosophy, Religious Studies, etc.</p>	<p>3</p> <p>Economy and Business</p> <p>Accounting, Advertising, Business, Game Theory, Marketing, Macroeconomics, Microeconomics, etc.</p>	<p>4</p> <p>Governance, Peace, Human Rights and International Relations</p> <p>Foreign Policy, Human Security, International Relations, Peace Studies, Politics, Political Economy, Public Policy, etc.</p>
<p>5</p> <p>Communication</p> <p>Applied Linguistics, Historical Linguistics, Phonetics, Phonology, Pragmatics, Semantics, Sociolinguistics, Syntax, etc.</p>	<p>6</p> <p>Expression</p> <p>Art Studies, Creative Writing, Film Studies, Literature, Media Studies, Photography, Theatre Studies, etc.</p>	<p>7</p> <p>Culture, Mind and Body, and Community</p> <p>Anthropology, Comparative Culture, Cultural Studies, Gender Studies, Sociology, Urban Studies, Psychology, etc.</p>	

*Courses are subject to change

A Liberal Arts Curriculum with Seven Clusters

SILS builds on the roots of a liberal arts education, and over the course of four years, the school curriculum will equip students with a pluralistic and international perspective, the ability to think logically, and excellent language skills, while they cultivate knowledge in a wide range of subjects.

Where Students Come From

Diversity in Coexistence

Approximately 30% of our students and faculty are non-Japanese nationals, and they come from approximately 50 countries and regions around the world.

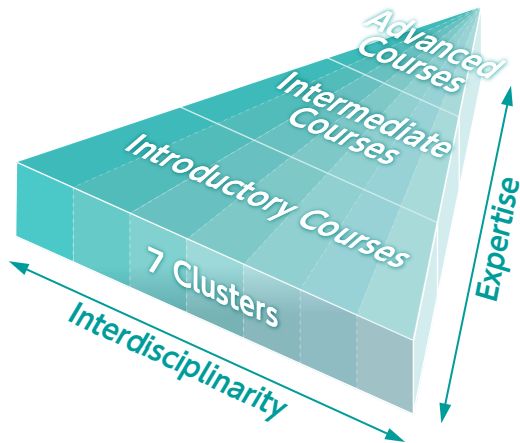

Small-class Education

Seminars are based on a ratio of one teacher for every 20 students. Through active discussions, dialogues, Q&As, and presentations, the students develop their linguistic competence and communication skills, enabling them to learn, think, and convey their views effectively.

Degree • Bachelor of Arts in International Liberal Studies

Curriculum

SILS has created seven different study clusters in order to allow students to become well-rounded and flexible individuals. Each cluster is divided into three levels: Introductory, Intermediate and Advanced. Instead of immediately throwing themselves into one particular discipline, students are encouraged to take the classes that interest them and gradually work toward more specialized knowledge.

Concentration Program

At SILS, students can study a wide range of academic fields. This program has been established to enable them to study specific ones in a structured way. Students who have earned the required number of credits in courses designated by each concentration (field of study) are eligible to receive a certificate of completion for the concentration upon graduation. More than 50 students complete concentrations each semester.

Fields of Concentration Programs

- American Studies
- Economics
- European Studies
- Global Governance
- History
- International Relations
- Linguistics
- Literature
- Mathematical Sciences
- Media Studies
- Political Economy of International Development

APM Program

The APM program (Area Studies and Plurilingual/Multicultural Education Program) focuses on French, Spanish, Chinese and Korean. In addition to studying the languages as courses, this program adopts the Content and Language Integrated Learning (CLIL) method, which brings together the learning content and language of instruction. Through this, students learn about topics pertaining to those countries such as culture, history, economy, and politics from multiple perspectives. A one-year study abroad program is also linked with the APM program, allowing students to choose to study abroad in the target country to deepen their knowledge. APM not only fosters students' plurilingual and multicultural skills, but also helps them become global citizens and leaders who are open to different cultures and backgrounds.

5BM Programme

The SILS-Sciences Po 5BM Programme is a competitive dual degree program (taught in English) designed for students interested in obtaining a Bachelor's degree from SILS and a Master's degree from Sciences Po within 5 years (or 5.5 years for April-entry students). Ranked 3rd internationally for Politics & International Studies (QS Ranking 2023), Sciences Po is one of the world's leading universities for Social Studies. Students can become multilingual with intensive French language courses during their studies there.

Students shortlisted by SILS and accepted by Sciences Po will be able to spend 2 years at Sciences Po after 3 years (or 3.5 years) of study in SILS. Every year, up to 5 students from SILS will be shortlisted.

School of Culture, Media and Society

JCuLP

Global Studies in Japanese Cultures Program

Introduction

Why Study in JCuLP?

JCuLP takes students through a humanistic exploration of the literary, artistic, and philosophical movements that shape Japan today. Students will not only study Japan's long and rich cultural tradition, but also explore its current vibrant and creative subcultures, such as manga, anime, and J-pop. Our diverse curriculum will expand your horizons and allow you to reexamine your own culture within a global context, giving you a different perspective and a deeper understanding of the world.

Features

A diverse group of students from Japan and abroad

An interdisciplinary curriculum that you can tailor to your interests

Japanese proficiency not required upon admission

Degree • Bachelor of Arts in Literature

Overview of the Coursework

Wide Range of Elective Courses

JAPANESE LITERATURE

- Contemporary Japanese Fiction in English Translation
- Reading and Translating Japanese Literature
- Adaptations of Classical Japanese Literature
- Storytelling and Media

VISUAL CULTURE AND MEDIA

- Global Tokyo
- Anime: The Face of Japanese Popular Culture
- Japan's Living Theater
- Japanese Cinema and Literature

JAPANESE CULTURE AND SOCIETY

- The Countryside in 20th Century Japan
- Sociolinguistic Dynamics in Japanese Languages
- Diverse Forms of Care in Japanese Society
- Ghosts and the Supernatural in Japanese Culture

WORLD LITERATURE & CREATIVE WRITING

- Imagination and Morality in East Asian Culture
- Women's Coming-of-Age Narratives
- Global Genre Fiction
- Introduction to Creative Writing

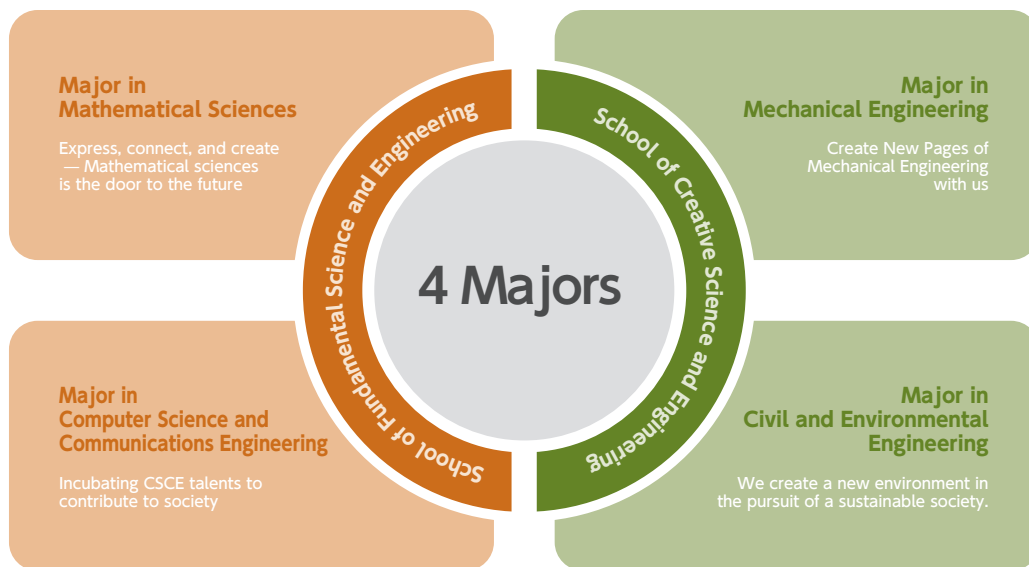

Faculty of Science and Engineering

- ◆ School of Fundamental Science and Engineering
- ◆ School of Creative Science and Engineering

Introduction

In 2010, the Faculty of Science and Engineering at Waseda University became one of the first institutions in Japan to introduce an English-based Program, offering students the opportunity to acquire an undergraduate degree based solely on learning in English. This program has been highly acclaimed both in Japan and overseas.

From April 2018, the undergraduate “English-based Program” was reorganized with education and research programs strengthened through the addition of new disciplines and by boosting faculty numbers. Based around this world-class program, we aim to create new value through the mutual stimulation of a diverse student body and by building the best possible environment for an education in science and engineering.

Features

Broad coverage of 4 major fields of science and engineering

Covers the most diverse range of fields of any international program in Japan.

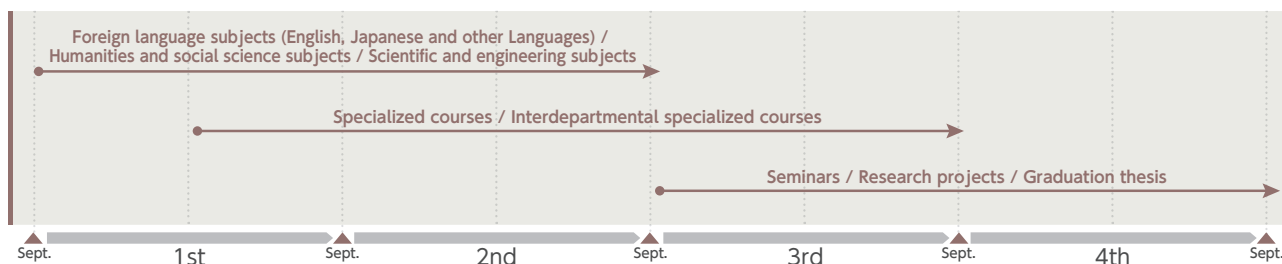

In the heart of a city well known as one of the safest and easiest places to live in the world, the Faculty of Science and Engineering is on the Nishi-Waseda campus.

Curriculum

※ The following information of curriculum is for September 2024 enrollment.

There are four Major courses covering a broad range of science and engineering fields over two undergraduate schools. Students in the undergraduate English-based Program obtain degrees in each Major upon conducting studies across the entire curriculum in English. (*The type of degree you can obtain depends on the chosen course.)

In the first and second years, students mainly take courses aimed at acquiring the foundational knowledge required in all fields of science and engineering, while preparing to take the specialized courses under each Major that begin from the second year. During graduation research, students are assigned to a research laboratory or seminar and work on compiling their graduation thesis under the direct guidance of their supervising professors.

All September enrollees in this program must take Japanese Language or other Languages.

* Students in Major in Mechanical Engineering must take Japanese language.

Departmental Affiliation and Degree

When students enroll in the English-based Undergraduate Program in Science and Engineering, Waseda University, each student is automatically affiliated with the School responsible for administering the students' chosen major program. At the end of their third year, each student's departmental affiliation is determined by the School taking into account the student's academic performance and preference. The table below shows the departments which students may be affiliated with according to their chosen major (e.g. students who choose to Major in Mathematical Sciences will be affiliated with either the Department of Mathematics or the Department of Applied Mathematics at the beginning of their fourth year).

As shown in the table below, the type of degree (i.e. a Bachelor of Science degree or a Bachelor of Engineering degree) a student will be conferred upon graduation will depend on the student's departmental affiliation.

Major	Degree	Department	School
Mathematical Sciences	• Bachelor of Science	• Mathematics	Fundamental Science and Engineering
	• Bachelor of Engineering	• Applied Mathematics	
Computer Science and Communications Engineering	• Bachelor of Engineering	• Computer Science and Engineering • Communications and Computer Engineering	
Mechanical Engineering	• Bachelor of Engineering	• Modern Mechanical Engineering	Creative Science and Engineering
Civil and Environmental Engineering	• Bachelor of Engineering	• Civil and Environmental Engineering • Resources and Environmental Engineering	

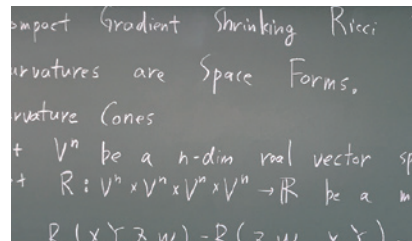

School of Fundamental Science and Engineering

Major in Mathematical Sciences

Express, connect, and create
- Mathematical sciences is the door to the future

The Major in Mathematical Sciences will provide a broad curriculum, ranging from fundamental to applied mathematics. The aim is to equip students with knowledge not only of mathematical sciences but also of its connections to scientific and engineering fields, and to provide students with the mathematical skills needed to make a contribution to society. The course places particular focus on three topics that are essential in modern society: nonlinear mathematics, computational mathematics, and statistical mathematics.

Degree • Bachelor of Science
 • Bachelor of Engineering

Major in Computer Science and Communications Engineering

Incubating CSCE talents to contribute to society

Students in the Computer Science and Communications Engineering Major acquire cutting-edge knowledge and skills required for an advanced networked and computerized society, encompassing computer science, computer engineering and communications engineering. The major aims to maximize the individual potential of each student and thereby foster future engineers who will be able to contribute to these fields in a global context and in a variety of professions. Career paths are diverse thanks to the recent computerization, and include software, electric machinery, telecommunications, broadcasting, and ICT services.

School of Creative Science and Engineering

Major in Mechanical Engineering

Create New Pages of Mechanical Engineering with us

“Modern mechanical engineering” covers traditional areas such as manufacturing as well as recent areas such as robotics and medical engineering. In response to recent various social demands, modern mechanical engineering is expected to integrate architecture and management system engineering into mechanical engineering. Students can graduate only by taking courses, including laboratory courses and graduation research, given in English, but students are recommended to take also courses given in Japanese to learn relationship between academia and industry in Japan.

Major in Civil and Environmental Engineering

We create a new environment in the pursuit of a sustainable society.

Covering the fundamentals of civil engineering, students learn how to create a better and more sustainable human society through the construction of infrastructure. The course includes environmental approaches to development, ensuring safety and security against natural hazards, and the improvement of urban environments. Career paths include engineers and planners for civil service, construction, transport, and energy industries. The Department of Civil and Environmental Engineering manages the major's educational program, in collaboration with the Department of Resources and Environmental Engineering and the Department of Architecture.

What a Global Culture Does

Aside from the obvious merits derived from immersing oneself in an unfamiliar culture, the university's practice of international learning is what drew me to Waseda, specifically the SPSE. As someone who studies politics in an effort to expand their worldview, what makes the SPSE perfect for me is that the international setting at Waseda never fails to challenge my perspectives, a blessing for any serious thinker. Professors from all walks of life urge exploration beyond textbooks. The diversity of the student body compels open-mindedness. And the global excellence that surrounds you demands a work ethic. Waseda's mode of learning equips you with tools that transcend the classroom by forcing you to do the very thing that constitutes not just a scholar, but a human being: thinking. It is how this university channels its cultural diversity that satiates the very desire that led me to political science.

An Opportunity to Learn and Make Friends in a Global Community

When I was looking into programs in Japan, I mainly looked for international programs with flexible curriculums that would suit my interests as they evolved. The TAIISI program at Waseda University stood out to me because of the promise of discussion-based lectures in combination with relatively small class sizes. Through the curriculum, I have been able to meet people from all walks of life who have helped me understand not only more about myself, but about the world. The invaluable friendships and shared learning experiences with people I truly respect make me proud to be a student in the TAIISI program.

Discovering interests I never knew I had

The main reason why I chose SILS is because I did not know what I wanted to be in the future. SILS offers such a diverse and liberating program in one of the most prosperous cities in the world; it was an opportunity I did not want to miss and definitely do not regret. If I told my freshman high school self about who I am today, she would have never believed me. SILS allowed me to discover interests I never knew I had in the first place, while learning a new language, which although difficult, I know will benefit me in what I hope will be my future career. Thanks to SILS, I now know I want to serve as a Foreign Officer for my country, the Philippines in the future.

BEZANILLA Y BOURGES, Malena

School of Culture, Media and Society
Global Studies in Japanese Cultures Program (JCulP)
Graduated from Lycée Pierre Lagourgue

Unique and Inimitable Global Experience

I always loved traveling and learning more about other countries and cultures. Japan was one of the countries that attracted me the most, by its intriguing mix of tradition and modernity. Waseda gave me the opportunity to come study in Tokyo at a prestigious university, and get an insight into the real Japanese culture and lifestyle. Studying in JCulP is providing me with a unique and inimitable global experience. At Waseda, people from all different backgrounds and cultures are welcomed warmly by both the student body and faculty alike. I believe JCulP is giving me the possibility to study both media and culture, and to take part in constructive discussions in an international environment. After my studies, I wish to work in the media industry to share the knowledge I developed during my university time with people who, like me, enjoy discovering the world.

My Multifaceted Waseda Experience

My interest in mathematics and Japanese culture has led me to Waseda University, which I consider an ideal fusion of these interests, as not many Japanese universities offer this major in an English-based undergraduate program. Additionally, at Waseda, I have the opportunity to complement my major with a minor in another field of interest, enriching my academic experience. This university has been instrumental in my learning and growth, fostered by a vibrant and diverse community. Professors here are very supportive, always ready to assist when I face challenges. Furthermore, Waseda hosts numerous student events, including intercultural exchanges and career/alumni talks, enriching my university experience!

Katerina Putri Allegracia

School of Fundamental Science and Engineering
Major in Mathematical Sciences
Graduated from Anglo-Chinese School (ACS) Jakarta

Aditya Sundar

School of Fundamental Science and Engineering
Major in Computer Science and Communications Engineering
Graduated from India International School in Japan (IISJ)

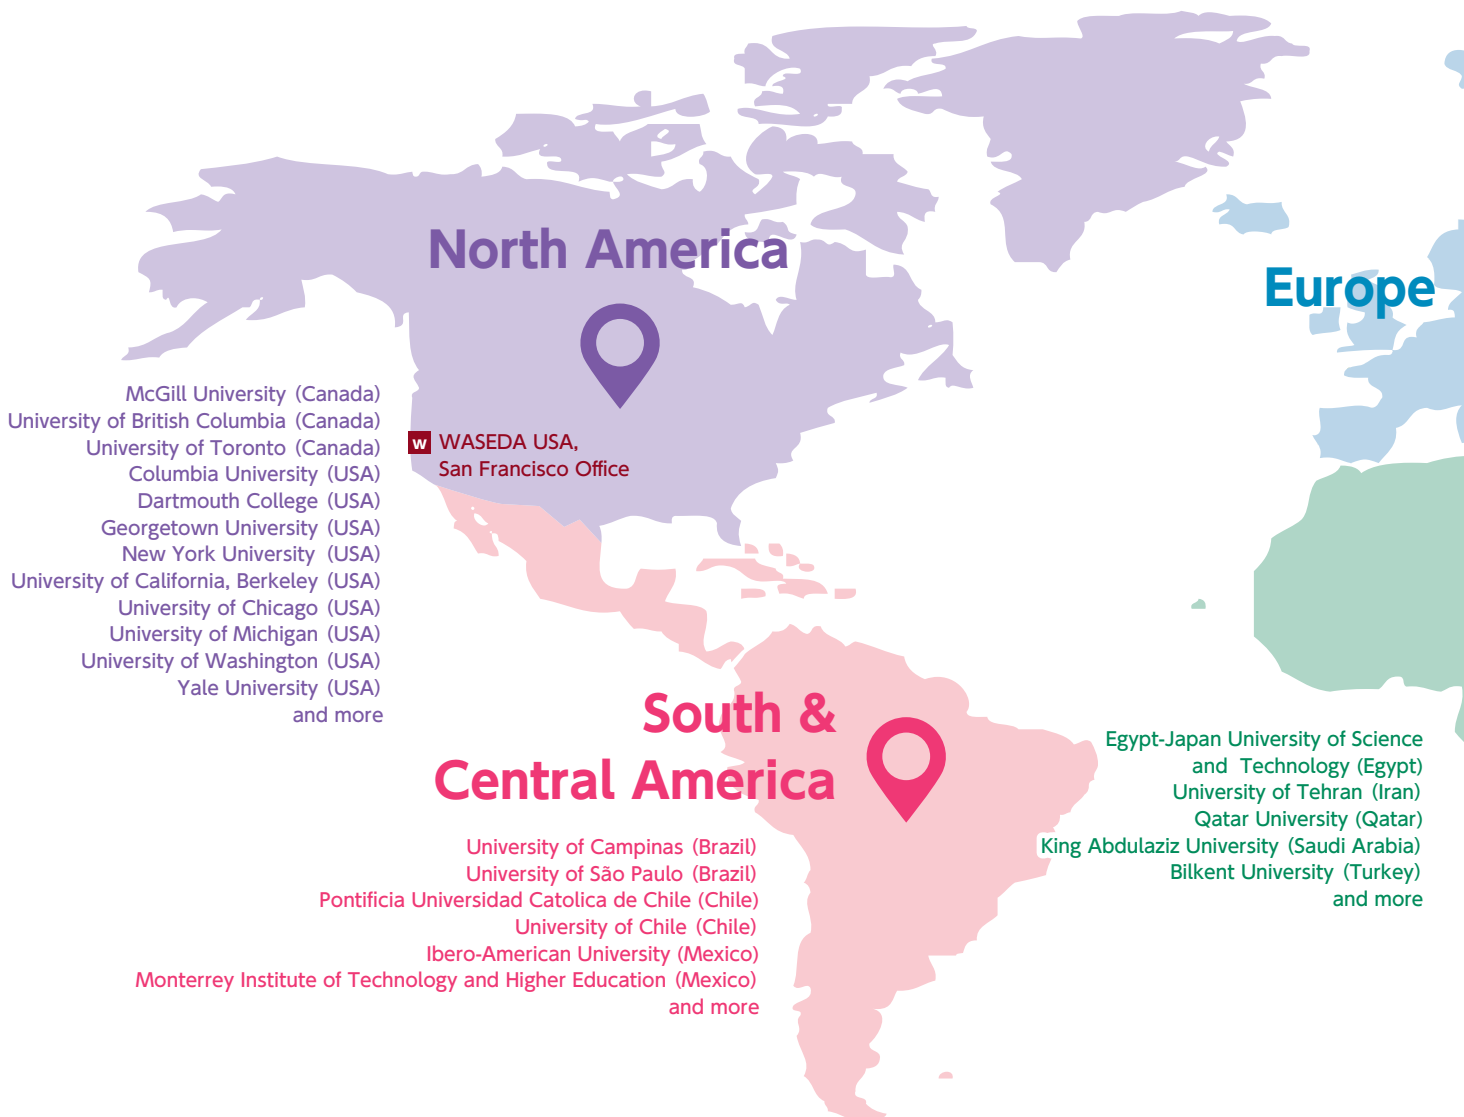

A unique and memorable experience at the heart of Tokyo

Reflecting on my three years at Waseda University, engaging in diverse courses and research has shaped and expanded my passion, unveiling new interests. Although in my first year, the number of courses I chose to take resulted in an intense amount of workload, after a year, the amount of freedom and time I had allowed me to focus on things outside academics as well. Outside of academics, I enjoy watching movies, playing games, photography, and programming. Although I've completed more than half my time here at Waseda, there are still lots of courses I wish to take and experience. Depending on your interests and passion, there are lots of courses to take and clubs to join at Waseda, and that is something all prospective students can look forward to.

WASEDA's World

Partnership agreements at both university and departmental levels with over **800** universities and institutions in **91** countries and regions

As of March 2024

Study Abroad Programs

▶ Double Degree Programs

Students earn designated degrees from both Waseda and their host university when they graduate with certain requirements satisfied. They need high-level foreign language skills as well as academic skills to complete the curriculum.

▶ Exchange Programs

Students study abroad based on exchange agreements with partner universities. They are required to have relatively high-level language skills and can take regular academic courses with local students.

▶ Customized Study Programs

These programs are designed especially for Waseda students. There are two types of programs: one where students can take regular academic courses, and one where they focus on brushing up a foreign language from beginner level.

▶ Short-term Programs

Students have a chance to develop their language skills and to learn the culture of their chosen country during spring or summer vacation. This can be a good opportunity to prepare for participating in a longer study abroad program in the future.

Student Dormitories

The Residence Life Center provides information about the various student dormitories near campus. The dormitory life would allow you to establish a network extending beyond the affiliated Schools, Departments and nations. Dormitories types are those directly managed by the university, such as WISH and Affiliated dormitories (including exclusive dormitories and recommended dormitories) operated by affiliated companies.

Furthermore, if you would prefer to rent your own apartment, the Student Housing Center - which is operated by Waseda University Property Management Corp - can assist you.

▶ Waseda International Student House (WISH)

Access	3 stops by Metro (approx. 9 min) from Waseda Station
Capacity	872
Fees	JPY 55,000 per month (includes utility fees)
Possible Length of Stay	2 years for April admissions and 1.5 years for September admissions (freshmen only)
Meals	Not provided (shared kitchen available)
Room Type	Single
Note	September admissions may be able to extend their length of stay by 0.5 years.

▶ Affiliated Dormitories

The student dormitories are operated by companies that have a cooperative relationship with Waseda University. You can choose the one that best suits your needs in terms of location, dormitory fees, facility type, and meal options. For details on each dormitory and how to apply, please refer to the Waseda University Residence Life Center website.

Expenses

Tuition

First Year Expenses

School	Expenses (JPY)	Expenses (USD)
Political Science and Economics	1,288,000	8,587
Social Sciences	1,256,800	8,379
International Liberal Studies	1,693,000	11,287
Culture, Media and Society	1,291,000	8,607
Fundamental Science and Engineering	1,859,000	12,393
Creative Science and Engineering	1,889,000 - 1,891,000	12,593 - 12,607

The above amounts are for September 2024 enrollment, including the admission fee (JPY 200,000), regular tuition fee and various administrative fees. The exchange rate used is 150 yen per dollar.

Living Expenses

Estimated Living Expenses (1 month)

	Expenses (JPY)	Expenses (USD)
Accommodation	80,000	533
Food and utilities	34,000	227
Other personal expenses	16,000	107
Total	130,000	867

Personal expenses will depend on the student's individual lifestyle. The estimates above are for reference only. The exchange rate used is 150 yen per dollar.

Scholarships

*Numbers below are as of March 2023.

Scholarships provided by Waseda

Max
1,000,000 yen
a year per student

Scholarships provided by external organizations that are available at Waseda

32%

of international undergraduate students receive a scholarship

Examples of Waseda Scholarships

Scholarship name	Amount	When you register
Yamada Taikichi and Asa Scholarship	JPY 1,000,000/year	After enrollment
Reserved Scholarship for Successful International Examinees	JPY 500,000/2 years	Before enrollment
Waseda University Partial Tuition-Waiver Scholarship for Privately Financed International Students	50% of annual tuition waived	Before enrollment / After enrollment
Okuma Memorial Scholarship	JPY 400,000/year	Before enrollment / After enrollment
Azusa Ono Memorial Scholarship for International Students	JPY 400,000/year	After enrollment

Meet One of Our Scholarship Recipients

Opening New Doors

I received the Global Leader International Student Scholarship (for incoming students) offered by Waseda University to privately financed international students who are deemed to have outstanding academic potential based on a holistic evaluation comprising application documents, academic records, and/or an interview.

One of the attractive points of this program is that there are no bonds involved. Upon applying to the program at the university, students are considered for this scholarship without the need for a separate application. Most eligible students are notified during the announcement of the screening results. Scholarships can be an important factor for students who need financial support when choosing a university.

My scholarship and studies in Japan have broadened my perspectives, providing me with the opportunity to learn a new language, gain a better understanding and deeper knowledge of the Japanese economy and society, and build a network of friends in the country, among many other benefits. I believe all of the aforementioned have opened new doors for opportunities in my career and beyond. My unique experiences have shaped me into a better and more well-informed individual—and that is the greatest implicit gift.

WANG, Yuelin

School of Political Science and Economics
Major in Economics
Graduated from Hwa Chong Institution

▶ Part-Time Job Opportunities

If you wish to do a part-time job to cover some of your expenses during your studies, Waseda University will help you find ones on or off campus.

*International students are allowed to do part-time jobs for up to 28 hours a week during the semester and 40 hours a week during summer/winter/spring breaks, by applying for a Part-Time Work Permit.

Career Path

As of April 2024

2023-2024 Academic Year: Post-Graduation Paths of 818 Students in English-based Undergraduate Programs

Choosing to enter graduate school to make use of undergraduate studies

I was always fond of Japan and knew I wanted to study there after graduating from my high school in Shanghai. I was not able to speak Japanese at all back in the time, so Waseda, with its well-developed English-based degree programs, became an obvious choice for me.

I always enjoyed dealing with math, so choosing applied mathematics as my major is a more-than-natural decision for me. Waseda's programs offer a sheer amount of subjects in English, which students are allowed to study freely — outside their areas of expertise, too. Despite most of the classes I took were centered around mathematics and computer science, I also took classes like literature and arts out of pure interest. Being able to join a lab in the undergraduate years and conduct a specialized research is a big perk of being in Waseda. I personally joined a probability and statistics-oriented lab in my third year of university and continued the study throughout my graduate life. Our lab offers seminars in both Japanese and English. This thereby grants chances to international students to communicate with Japanese students and allows them to extend their Japanese skills outside of everyday conversation. I want to work for an IT company in Japan in the future and put what I have learned about statistical analysis to use.

Waseda offers many opportunities to grow both on and off campus. To make the most out of them, I encourage everyone to go bold and worry less about the failures.

CHEN, Chung-an

Taiwan

Graduated from the Department of Applied Mathematics in the School of Fundamental Science and Engineering in 2020

Working on a master's degree in Pure and Applied Mathematics at the Graduate School of Fundamental Science and Engineering

CHODEN, Sonam

Bhutan

Graduated from the School of International Liberal Studies in 2019

Earned a master's degree from the Graduate School of Asia-Pacific Studies in 2021

Works at HENNGE K.K.

You can seek out your future goals at Waseda

I was born in Bhutan and lived in Qatar until I graduated from high school. I liked manga and anime from when I was a child, which led me to want to study in Japan. So, I came here in 2014 and was attending Japanese language school when I heard about Waseda's English-based degree programs, and I enrolled the following year.

The School of International Liberal Studies enables students to take courses in a wide range of academic fields. I mainly took journalism courses in my first year and international relations ones in my second year. In my third year, I became interested in Children's rights during a Seminar on Governance and then entered graduate school to research further on Women's and Children's rights. Looking back, when I first came to Waseda, my interests were too varied and I had no goals for my future. The School of International Liberal Studies' curriculum was perfect for me at that time; it let me delve into my interests and test out a diverse range of fields. I love that Waseda is brimming with internationality, too: there is a strong culture of encouraging people to understand others, regardless of nationality.

At my job, I work in human resources. I get to interview internship candidates from around the world online, which lets me put my experience interacting with friends with diverse backgrounds at Waseda to use. I hope that everyone will do their best to widen their circle of friends and learn Japanese while at Waseda. You can open up a whole new world that way, and it will give you more choices in the future.
